SUMMARY

Results-driven **Java Developer** with a solid background in Core Java, SQL, and web development frameworks. Known for optimizing critical application processes, enhancing system performance, and ensuring seamless integration across diverse platforms. Proficient in troubleshooting and implementing robust solutions to meet client requirements. Adept at leveraging front-end technologies to improve user interaction. Strong communicator with a focus on delivering exceptional software solutions within project timelines.

CORE EXPERTISE

CORE JAVA
JAVA 2 ENTERPRISE EDITION (J2EE)
DESIGN PATTERNS (HLD/LLD)
SPRING BOOT
RESTFUL APIs
MICROSERVICES
DATA STRUCTURE ALGORITH (DSA)
STRUCTURED QUERY (SQL)
HTML, CSS, JAVASCRIPT
REACTJS
LINUX (PRODUCTION HANDLING)
EXCEPTION HANDLING
THREAD/MULTITHREADING
APPLICATION PROGRAMMING
TROUBLSHOOTING
DEBUGGING
GITLAB,BITBUCKET
CLOUD COMPUTING
CI/CD TOOLS
IBM (SGF, B2B INTEGRATOR, CC)
CONTAINERIZATION

INTERESTS

- Event Management
- Music Festivals
- Team Player
- Athletics
- Exploring New Places

EDUCATION

Maharana Pratap Engineering College

Bachelor's of Technology (B.Tech)
2016 – 2020
71%, Kanpur

Higher Secondary Education

Chacha Nehru Smarak Inter College
2015 – 2016
85%, Kanpur

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICE (TCS)
11/2021 – PRESENT
PROJECT - DEN NORSKE BANK (DNB)
JAVA DEVELOPER

- Utilizing **Agile** Methodology for handling critical application and value chains with the help of **JIRA and Confluence.**
- Helped Team to Create Value Chains, Changes on old created value chain with **JAVA, J2EE and Springboot.**
- Handling and Upgrading Database of the System according to requirement by using **SQL on the Business Process.**
- Following SDLC life cycle - **Designing , Coding, Testing, Debugging and Production Support**.
- Creating and Managing Jobs, Which are related to Internal and External Client and Part on **On-boarding client**.
- Working on multiple application like **IBM B2B Integrator, Control Center, Sterling File Gateway, Dynatrace and Profile Creater** on Same time.
- Managing production and testing servers and handling the deployment of new setups from testing to production using **Linux and Putty**.

INTERNAL PROJECT

Sterling File Gateway (SFG)

- Following an File Gateway model indicates a comprehensive system that likely involves various file transfer for different business processes such as HR, finance and Combining **HTML, CSS, AngularJS, Java, SQL, and JDBC** indicates a multi-tiered technology stack.

CERTIFICATIONS

- **Springboot Operations** - Here Learned Basic Concepts of Spring Architecture, Annotation, Dependencies, Pom.xml, Bean Factories and Spring Data Flowchart.
- **Restful HTTP Architecture** - Completed comprehensive training on HTTP Connections, Rest API architecture and designing, API Testing and Validation and Web Securities.
- **Web Development** - Successfully completed training in web development covering HTML, CSS, Bootstrap, and SQL.
